

IEEE Milwaukee Section Women in Engineering Affinity Group Meeting Minutes  
February 2, 2004, 12pm-1pm

Present: Edina Bajrektarevic, Judy Daley, Jennifer Rothwell

The group met to discuss plans for Introduce a Girl to Engineering Day (2/26/04), part of National Engineer's Week.

- The group plans to make presentations at one or two local schools, introducing students to engineering and providing a few simple engineering projects in which the students can participate.
- We reviewed a number of projects provided by IEEE and selected a couple appropriate for middle and high school.
- Judy has arranged with Erin Elementary School to do presentations with the 7th graders. Edina and Judy will be a team and will mock up some of the projects.
- It was agreed to pursue a presentation at St. Joan Antida, even though it would not be during class time and student participation cannot be guaranteed. Jennifer to contact Karen Janke so she can follow up with the school.
