

IEEE Milwaukee Section WIE Meeting Minutes
July 12, 2004, 5pm-6:30pm

Present: Edina Bajrektarevic, Judy Daley, Karen Jahnke, Jennifer Rothwell

- 1) Robotics Project - the group brainstormed ideas for this project. Edina indicated that ATC may provide some funds; Karen and Jennifer provided information on applying for foundation grants from ManPower and We Energies. It was decided the best approach may be to acquire funding to purchase a number of the kits, and that the group will keep the kits rather than give them to students, so that they can be re-used. We need to approach some schools to gauge their interest, determine number of students involved, and timeframe. Judy will follow-up with Erin Elementary and her Girl Scout troupe. Karen to follow up with St. Joan Antida. Karen/Edina to begin drafting proposal.
- 2) Karen is also approaching Discovery World about partnering with them on the robotics project and/or other projects.
- 3) Edina announced the addition of two new Members: Elizabeth Vent and Elizabeth Whiting. Welcome!
- 4) Edina and Elizabeth Whiting have volunteered to work on enhancing our web site.
- 4) The national WIE organization is publishing a book of successful women engineers and will provide copies for chapters to distribute.
