

IEEE Canada

IEEE Hamilton Section

The Alexander Graham Bell IEEE Milestone

Speaker – Ron Potts

Date: Thursday January 10, 2008 @ 7:00pm

Where: ArcelorMittal (Dofasco) Main Office

Please join us for a presentation on the IEEE Alexander Graham Bell Historical Milestone. This presentation will first focus in on Bell's achievement that took place in Branford in 1876. Thanks to some hard work by the Hamilton Section Life Members, the IEEE has decided to place a commemorative plaque at this site outlining this Historical Achievement. Ron Potts will be presenting the research that the Life Members did to achieve this Milestone. Mr. Potts who is the Region 7 Life Member Chair will also bring us up to date on the Banting Pacemaker Milestone which the Toronto Section has under development.

Along with the updates and background on these two important Milestones, Ron will also be discussing the Ontario Power Niagara Tunnel Project. He will be able to give details of the route this tunnel is taking, what machines are being used to excavate and overall progress of this project.

The presentation will take place at the ArcelorMittal Main Office, formally the Dofasco Main Office, Conference Room E. Parking is free and a map to this location is shown below.

Refreshments will be provide by the Hamilton Section
(coffee / coke / cookies)

Information request: blair.maccuish@arcelormittal.com
