Region 3,

Welcome to 2012. First let me say thanks for your support over the past two years as we have provided a lot of support to our fellow members as they have gone through transitions in their careers. We have organized a lot of tools, trained Employment Support resources in every Section and directly supported hundreds of members. But, our work is not over. Next, we need to finish the job of creating our local Jobs Boards. Please let Ed Kirchner or myself know if you have a person in your Section that has the connections, time and personality for this important function. We can then take care of the training, motivation and support that this person will need.

I'm also supporting Bill Williams as his mentor for Membership Recruitment & Recovery. Bill is quickly coming up to speed and please give him your attention as he helps you as Sections and Members stay connected into the process that will help us grow Region 3.

Finally, I am keeping busy developing the 2012 IEEE International Electric Vehicle Conference that will be held March 4-8, 2012 in Greenville, SC. I encourage all of you to attend, learn and network. Electric Vehicles are not only coming, they are here. Please participate at this conference and become a part of this world changing technology. And, encourage your fellow members to attend. More information on this conference can be found at,

<http://electricvehicle.ieee.org>

See you there.

Sincerely,

Lee Stogner, PMP
2011 - 2012 Director, Region 3
Chair, IEEE Transportation Electrification Initiative
Member, IEEE Smart Grid Initiative
Member, IEEE Public Visibility Committee
Chair, IEEE-USA Membership Development Committee

From Prototype to Mass Production and Mass Use

The first IEEE International Electric Vehicle Conference (IEVC) will facilitate the exchange of information on new global trends in technology, engineering, standards and deployment aspects among academic and industrial thought leaders of the fast-growing electric mobility ecosystem via a unique cross-organizational platform.

Who Will Be There

Keynote speakers and panel leaders include executives and leading experts from organizations such as BMW, Bosch, Chrysler, Delphi, Duke Energy, EDTA, GE, FedEx, KEMET, MBTech, SAE, Valeo, Volkswagen...and many others.

Who Should Attend

IEVC is an international venue for those with an interest in the transformation of the transportation industry via electrification, including electrical vehicle designers, component and infrastructure system developers, manufacturers, utility experts, corporate executives, technical analysts, researchers, educators, entrepreneurs, venture capitalists, legislators, regulators and standardization experts.
