

Sections Congress 2017

Region 3 – Sections Congress Recommendations

02 April 2017

IEEE
Advancing Technology for Humanity

Proposed Recommendations

- ***MOVE – 45***
  - IEEE to facilitate creating a fleet of MOVE Disaster Response vehicles to increase visibility of the profession across the globe and provide disaster relief, STEM education, networking, and public service to our local communities.
- ***IEEE University – exists already – 42***
  - IEEE to establish an accredited life-long distance learning opportunities to provide members with the ability to take courses for credit. This should include subjects such as Professional Engineering preparation courses, continuing education (CEU) opportunities, and professional leadership training (e.g. Harvard Manage Mentor). Sections should be given the resources to be able to host the courses offered as a service to their membership either as a "canned" presentation/webinar or hosting of remote courses.
- ***Pre-College STEM Programs – 37***
  - Create a "Junior IEEE" membership program targeted at pre-college students. Develop (or expand existing) training programs to allow members to provide STEM activities to pre-college students. Provide "canned" or "in a box" style demonstrations and presentations that local sections can deliver to pre-college students.
- ***WIE – 33***
  - Make WIE membership free to join
