IEEE R3 Richmond Section Report

Nov 14, 2022

Issues requiring action by the Region 3 Committee or ExCom

None at this time.

Successes/Opportunities for Engaging the member, volunteer, non-member, public

- I met with several of the new officers of the Virginia Commonwealth University Student Branch and we had a good discussion about resources that we can make available to them. We also talked about multiple opportunities that are available for interactions between the students and members of industry. The student officers were provided with the contact information of several volunteers who had expressed an interest in working with the students on things like resume reviews and career mentoring.
- I emailed all the (non-Fellow) members of the Richmond Section who had a title of Dr. or who worked at a university or research lab to make sure that they were aware that R3 would host an IEEE Fellows Information Session on November 9th. I received a number of responses saying that they had missed the original announcement but would try to attend. Sonya Dillard and Hulya Kirkici agreed to record the meeting and Hulya has agreed to make the recording available on a limited basis for those who were not able to attend the live meeting.

Notable section activities (positive and negative)

- None at this time.
