Section Support Committee Report

August 26, 2024

Please see attached powerpoint for Senior Member updates.

The SSC has provided three workshops so far this year:
OU Analytics Basics
Preparing for your Section Elections
OU Analytics Advanced

To meet (and exceed!) our goal of 9 workshops for the year, we are presenting the following SSC workshops. We are still working on scheduling of speakers and panelists, but <u>mark your calendar</u> for the following dates:

September 16
September 30
October 7
October 21
November 4
November 18
December 2
December 16

Topics we are working on (and potential leads):

- Care and feeding of your LM affinity group (and why you should have one!) Panel Discussion
- Finances and Budgets - preparing for next year and beyond (working with Joe P to develop)
- Projects (not just THE PROJECTS) (Allen)
- Engaging with Students (RSAC)
- Conferences and Workshops for your Section (R3 Conf Committee)
- Industry Relations (IR committee)
- Getting YPs Engaged (Binesh)

(note that we have 8 slots for 7 presentations. Do you have a topic not listed above that you would like to see? Contact us!)

All are being recorded for future training. As some of these workshops work with sensitive data (e.g. member data), we are working with the communications committee for a secure location to enable authorized volunteers to view them. This access will be announced as soon as it is put in place.
