# IEEE MOVE India Vehicle

The MOVE India Vehicle is rugged and is designed for India's diverse landscapes and is capable of delivering uninterrupted power and communications in disaster zones. The vehicle is equipped with emergency communication systems, a hybrid solar power system and interactive STEM kits. When not deployed for emergencies, the vehicle transforms into a full-featured education platform, equipped with hands-on STEM kits focusing on climate action, sustainability, and disaster readiness.

It aims to visit over 100 schools annually, initially across Karnataka, and later expand to other states.

## Bengaluru gets IEEE's first Mobile Outreach Vehicle outside US

The truck has a solar and grid-interactive energy system with a hybrid inverter and a lithium-ion battery bank that can provide up to 30 hours of power.

## IEEE launches custom MOVE vehicle in India for disaster relief and STEM outreach

This robust vehicle ensures continuous uptime and connectivity even in remote or disaster-hit areas, supporting both emergency response and community outreach

By Abhinav Singh | Updated: July 21, 2025 21:17 IST

After having made its mark in the United States, IEEE's Mobile Outreach Vehicle (MOVE) will be deployed for the first time outside the US in India. This vehicle was deployed in disaster relief operations in the US and IEEE, which is one of the world's largest technical professional organisation, has worked closely with the Red Cross in the US to deploy it successfully at many disaster relief operations there, including the forest fires in California in the US. To begin with only one vehicle will be initially launched in India. In the US, a total of three vehicles have been in operation ever since 2016 and have been deployed regularly.

## For girls to go into engineering, they need role models, and that starts in the classroom, not the boardroom: Mary Ellen Randall

By Nirmal John, ET Bureau • Last Updated: Aug 03, 2025, 08:04:00 AM IST

FOLLOW US SHARE FONT SIZE SAVE

### Synopsis

IEEE president-elect Mary Ellen Randall wants more girls in engineering—and says role models, not just curriculum tweaks, are key. From AI standards to STEM trucks in India, she's pushing for change that's hands-on, human and global.

It is an organisation that pretty much touches every soul on the planet and yet not many know about it. The Institute of Electrical and Electronics Engineers (IEEE) is the world's largest technical professional organisation, and it oversees the setting of technical standards in areas ranging from communications and aerospace to

healthcare, software and energy. [Mary Ellen Randall](#), IEEE's president-elect, oversees this vast community of geeks. She speaks to Nirmal John on geopolitics, India's engineering talent, AI standards and better [STEM education](#), especially for girls. Edited excerpts:

## For Girls to Go into Engineering, They Need Role Models

It is an organisation that pretty much touches every soul on the planet and yet not many know about it. The Institute of Electrical and Electronics Engineers (IEEE) is the world's largest technical professional organisation, and it oversees the setting of technical standards in areas ranging from communications and aerospace to healthcare, software and energy. Mary Ellen Randall, IEEE's president-elect, oversees this vast community of geeks. She speaks to Nirmal Jaha on geopolitics, India's engineering talent, AI standards and better STEM education, especially for girls. Edited excerpts:

### Have the complex geopolitical affairs affected conversations about technology in organisations like IEEE?

Well, we are not a political organisation. We like to exchange ideas across scientific minds and technical minds, and try to advance technology. We discourage working together and sharing ideas, learning from each other, supporting each other, networking and developing standards that can be used around the

world. Over 1,000 such standards are already in place, and another 1,000 are in the works. So there are many ways that we interface with the technical community. In January, IEEE surpassed the \$50,000 member mark. So we do have a vast community.

**My question was not necessarily from a political point of view, but more about collaboration across borders. A certain close-mindedness is coming into the world at the moment, right?**  
Well, everything affects everything. It comes down to people, in my opinion. In IEEE, we are all there because we want to make a difference. So people do want to share and uplift each other and provide

support around the world. We are a public charity with members. And that's our secret sauce. I think our members are very generous in giving and sharing. IEEE holds over 1,200 conferences each year, and in those conferences, people come from all over the world. Our local organisational units are across 190 countries, so we still have many people that we can work with, regardless of what's going on in the world at large. I can't say we are not affected by what is going on, but we have a very solid organisational unit where we can work together and make a difference.

### You are working on AI standards. In most cases, the standards are decided first and the tech is built on top of it. Here you have a tech that is out, being used by the public and standards are being retrofitted.

**How does that influence IEEE's role?**  
Well, you are right. This is complicated, but it's also very powerful. We want to put some guardrails that help you to know how accurate is the information you are getting from AI and how you ensure there's no bias in the data. How do you make sure that it's used in a responsible and ethical way?

**Does it make the role of IEEE a little more difficult when nations put different kinds of guardrails or indeed remove them?**  
Yeah. Take internet security—there are different laws in different countries, and we grapple with all that and try to come up with a global common foundation in order to operate at a worldwide level. But you are correct that things are going on in

different countries that can affect how we solve the problem.

### India produces a large number of engineering graduates every year but lags in terms of engineering-led innovation. What can fix that?

I've had the opportunity to visit some of the universities in India and talk to some of the students and graduate students and the professors. What I found is that there is a lot of entrepreneurial emphasis in India, and there's a lot of support for students innovating and starting companies. Those are all good seeds that are being planted. I don't

**"We want to put some guardrails that help you to know how accurate is the information you are getting from AI and how do you ensure there's no bias in the data. How do you make sure that it's used in a responsible and ethical way?"**

see quite what you are describing. I know the professors, I know several of them through IEEE, and they are very dedicated to making sure that the students coming out of the universities are very well equipped to handle global problems. What I really like is that there is a strong humanitarian focus. **What can organisations like IEEE do to encourage more girls to take up science, particularly in the Global South?**

In IEEE we have a women-in-engineering group. You can also have local groups of women who get together, and we are also joined at the worldwide level. Many of the people that I visited when I was in India were women who were in authority positions. The head of our India council is a woman. We do a lot of STEM outreach for everyone in the younger grades. A lot of the people that deliver that are women. One of the things that we found in our experience is that for them to go into engineering, they need a role model. And so when they start to see these women coming in and imparting knowledge, that encourages others.

### You launched an initiative called MOVE (Mobility Outreach Vehicle) in India recently.

In the US, we get hit by a lot of storms, and with that comes a lot of flooding. A lot of high winds cause damage to large areas. The infrastructure goes out, and people are sometimes without power and communication for weeks at a time. We wanted to help. We have such a great skill base. We have IT people who have engineers. They are all natural problem solvers. So MOVE came out of that and is a nice truck with tech, power and communications equipment. It has just grown and grown and grown. When we are not fighting disasters, we can take it to schools, and have a live demonstration of what engineers do. We unveiled the first truck outside the US in India last week. The India team has also developed some beautiful science kits that they take to schools.

## Using tech to help humanity

In this episode of Our Own Devices, our host Nandagopal Rajan, COO, The Indian Express Online is joined by Mary Ellen Randall, President-Elect, IEEE. In this conversation they explore the ways in which technology can be put to use for humanitarian causes. Mary shares how IEEE has been using tech to help out people who suffer during natural disasters and to educate young people and even school going children about what they can do in case of a disaster. She talks about their efforts beyond disaster management and also how they adapt their tech according to the people whom they are serving. To know more about how IEEE is using technology for the right causes, tune into today's episode of Our Own Devices with Nandagopal Rajan.

## India Gets First IEEE MOVE Vehicle With Solar Power and Emergency Wi-Fi

IEEE has launched its first MOVE outreach vehicle outside the US, starting in India. The van is equipped with solar power, emergency communications, and climate education kits. It will support both disaster response and STEM outreach, beginning with schools in Karnataka.

**New Delhi:** India has just received its first-ever IEEE MOVE vehicle, and it's unlike anything on the road. Meant to support both disaster response and STEM education, this new mobile unit was officially launched on July 21 at the IEEE India Office inside Bengaluru's World Trade Center. It's the first time IEEE has deployed such a vehicle outside the United States.

## ಭಾರತದಲ್ಲಿ ಗ್ಲೋಬಲ್ ಮೂವ್ ವೆಹಿಕಲ್ ಆರಂಭ

ಬೆಂಗಳೂರು: ವಿಶ್ವದ ಅತಿದೊಡ್ಡ ತಾಂತ್ರಿಕ ವೃತ್ತಿಪರ ಸಂಸ್ಥೆಯಾಗಿ, ಮಾನವೀಯತೆಗಾಗಿ ತಂತ್ರಜ್ಞಾನವನ್ನು ಮುಂದುವರಿಸುವ ತನ್ನ ಬದ್ಧತೆಯನ್ನು ದೃಢಪಡಿಸಿದೆ. ತನ್ನ ಮಾನವೀಯ ತಂತ್ರಜ್ಞಾನ ಕಾರ್ಯಕ್ರಮದ ಜಾಗತಿಕ ವಿಸ್ತರಣೆಯಲ್ಲಿ ಮಹತ್ವದ ಮೈಲಿಗಲ್ಲೊಂದನ್ನು ಸಾಧಿಸಿದ್ದು, ಅಮೆರಿಕದ (ಯುಎಸ್) ಹೊರಗೆ ತನ್ನ ಮೊದಲ ಮೊಬೈಲ್ ಡಿಜಿಟಲ್ ವೆಹಿಕಲ್ (ಮೂವ್) ಅನ್ನು ಮೂವ್ ಡಿಜಿಟಲ್ ಇಂಡಿಯಾ ಕಾರ್ಯಕ್ರಮದಲ್ಲಿಯೇ ಇಂಡಿಯಾ ವಾಹನವನ್ನು ಬೆಂಗಳೂರಿನ ಎಕ್ಸ್ ಪ್ರೆಸ್ ಪ್ರಾಕಾರ ಕೇಂದ್ರದಲ್ಲಿರುವ ಇಂಜಿನಿಯರಿಂಗ್ ಕಾಲೇಜಿನಲ್ಲಿ ಇಂದು ಅನಾವರಣಗೊಳಿಸಿದೆ. ಈ ವಾಹನವನ್ನು ಭಾರತದ ವಿವಿಧ ಸಮುದಾಯಗಳಿಗೆ ಶೈಕ್ಷಣಿಕ ಸಂಪನ್ಮೂಲಗಳನ್ನು ತಲುಪಿಸುವ ಉದ್ದೇಶದಿಂದ ವಿಸ್ತರಿಸಲಾಗಿದೆ.

ಜೊತೆಗೆ ಭವಿಷ್ಯದಲ್ಲಿ ಕರ್ನಾಟಕದ ತುರ್ತು ಸಂದರ್ಭಗಳಲ್ಲಿ ಪರಿಹಾರ ಕಾರ್ಯಕರ್ತರಿಗೆ ಸಂವಹನ ಮತ್ತು ತಾಂತ್ರಿಕ ಬೆಂಬಲವನ್ನು ಒದಗಿಸುವ ಗುರಿಯನ್ನು ಹೊಂದಿದೆ. ಈ ಮಹತ್ವಾಕಾಂಕ್ಷಿ ಯೋಜನೆಯು ಶಿಕ್ಷಣ, ತಂತ್ರಜ್ಞಾನ, ಮತ್ತು ತುರ್ತು ಪರಿಹಾರ ಕಾರ್ಯಗಳ ಮೂಲಕ ಸಮಾಜದ ಮೇಲೆ ಸಹಕಾರಕ ಪರಿಣಾಮ ಬೀರಲು ಬದ್ಧತೆಯನ್ನು ಪ್ರತಿಬಿಂಬಿಸುತ್ತದೆ. "ಮೂವ್ ಕಾರ್ಯಕ್ರಮದ ಅದ್ಭುತ ಪರಿಣಾಮವನ್ನು ಕಂಡು ಭಾರತದಲ್ಲಿ ಅದರ ಕೆಲಸದ ಬಗ್ಗೆ ನಾವು ರೋಮಾಂಚಿತರಾಗಿದ್ದೇವೆ" ಎಂದು 2025 ಇಂಜಿನಿಯರಿಂಗ್ ಅಧ್ಯಕ್ಷ ಮತ್ತು ಸಿಇಒ, ಕಾರ್ಡಿನಲ್ ಕ್ರಾಮರ್ ಹೇಳಿದರು. "ಈ ಹೆಜ್ಜೆ ನಮ್ಮ ಜಾಗತಿಕ ಪ್ರಯತ್ನಗಳನ್ನು ವಿಸ್ತರಿಸುತ್ತದೆ. ಭಾರತದಲ್ಲಿ ತುರ್ತು ಸಂದರ್ಭಗಳಲ್ಲಿ ಮಹತ್ವದ ಸಂವಹನ ಮತ್ತು ಶಕ್ತಿ ಬೆಂಬಲವನ್ನು ಒದಗಿಸುತ್ತದೆ. ಜೊತೆಗೆ ಹೂಮಾನ ಬದಲಾವಣೆ ಮತ್ತು ವಿವಿಧ ಜಾಗತೀಯ ಬಗ್ಗೆ ಖಚಿತವಾದ ಶಿಕ್ಷಣದ ಮೂಲಕ ಮುಂದಿನ ಪೀಳಿಗೆಯನ್ನು ಪ್ರೇರೇಪಿಸುತ್ತದೆ" ಎಂದು ಬರಲಾದ ಪ್ರೊಫೆಸರ್ ಟ್ರಾವೆಲ್ ಜಾಕಿನ್ ಮೇಲೆ ನಿರ್ಮಿಸಲಾಗಿರುವ ಮತ್ತು ಭಾರತದ ವೈವಿಧ್ಯಮಯ ಭೂಪ್ರದೇಶಗಳಲ್ಲಿ ಸಂಚರಿಸಲು ವಿಸ್ತರಿಸಲಾದ ಮೂವ್ ಇಂಡಿಯಾ ವಾಹನವು ತನ್ನ ಮಾದ್ಯುಲರ್ ವಿಸ್ತರಣೆ, ಶಕ್ತಿ ವ್ಯವಸ್ಥೆ ಮತ್ತು ಸುರಕ್ಷಿತ ತುರ್ತು ಸಂವಹನ ಸಾಧನಗಳ ಮೂಲಕ ವಿಶೇಷ ಸಂದರ್ಭದಲ್ಲಿ ತಂತ್ರಜ್ಞಾನ ಮತ್ತು ಸಂವಹನ ಸಾಧನಗಳನ್ನು ಒದಗಿಸುತ್ತದೆ.

# MGC 2025 Budget: Current Status

As of August 31

## MOVE Global

Budget	\$124,090.00
Actual YTD	\$29,883.75
Variance	\$94,206.25

## MOVE USA

Budget	\$237,050.00
Actual YTD	\$94,522.27
Variance	\$142,527.73

## MOVE Puerto Rico

Budget	\$25,000.00
Actual YTD	\$7,529.94
Variance	\$17,470.06

## MOVE India

Budget	\$13,410.00
Actual YTD	\$13,410.00
Variance	\$0.00

# MGC Budget Breakdown

## STEM, Outreach, and PV

Budget	\$26,000.00
Actual YTD	\$11,557.60
Variance	\$14,442.40

## Capacity Building & Training, Education

Budget	\$15,000.00
Actual YTD	\$3,896.66
Variance	\$11,103.34

## MGC Meeting Expenses and travel

Budget	\$15,000.00
Actual YTD	\$0.00
Variance	\$15,000.00

## Equipment Purchases for new locale

Budget	\$33,090.00
Actual YTD	\$0.00
Variance	\$33,090.00

## Social Media Marketing/Tools/Platforms

Budget	\$12,000.00
Actual YTD	\$7,205.00
Variance	\$4,795.00

## Promotional Items/Marketing

Budget	\$10,000.00
Actual YTD	\$1,982.73
Variance	\$8,017.27

## Operations & Administrative Costs

Budget	\$3,000.00
Actual YTD	\$125.19
Variance	\$2,874.81

## Program Manager Travel

Budget	\$10,000.00
Actual YTD	\$5,116.57
Variance	\$4,883.43

# Budget input for the remainder of the year

Thoughts on remaining budget spending:

- Purchase STEM Kits (India and USA)
- Shared Promotional materials
- Locale budget requests
- others?

# 2025 MGC Goals

1. Establish, maintain, and execute processes and resources for MOVE program expansions

1. Design and implement a MOVE global marketing strategy
1. Develop a fundraising and sustainability plan for MOVE

1. Enhance MOVE educational and outreach offerings

1. Establish and maintain MOVE partners for deployment, STEM and outreach opportunities

# IEEE MOVE Global- Accomplishments to Date

## **MOVE program expansions (MGC goal)**

- PPT created- About MOVE & How to establish MOVE Locale
- Presentations delivered to Ecuador, SE Asia, Nigeria and Tunisia
- Requirements for Operations Checklist- India example shared by Grayson- in draft
- [Need: evaluation process and detailed checklist for start up](#)

## **Design and implement a MOVE global marketing strategy (MGC goal)**

- Digital Pollen contracted
- MOVE Global social media templates created, Canva access shared with Locale chairs
- [Recommendation - Website redesign 2026](#)

## **Enhance MOVE educational and outreach offerings (MGC goal)**

- MOVE Tech Talks in the process of being uploaded to IEEEtv
- [Need: Collaboration on shared STEM resources and repository \(Sadhana/Melody\)](#)

## **Establish and maintain MOVE partners for deployment, STEM and outreach opportunities (MGC goal)**

- MOVE USA leading efforts renewing Red Cross MOU
- Multiple MOVE USA, MOVE PR, and MOVE India STEM events - stats pending

# IEEE MOVE Global- Accomplishments to Date

## Promote Public Visibility

- Successful MOVE India launch & Media outreach
- Participated in Life Members Conference
- IEEE Foundation Donors “Thank you- 2024 Year End re-cap” Webinar in June
- MOVE material at IEEE Board meetings
- Digital MOVE USA newsletters

## Improved Processes

- Updates to MGC guidelines
- MOVE Deployment notification to IEEE Leadership process established
- MOVE Financial transparency - budget updates reported at quarterly MGC meetings
- Transition from USA and PR CB accounts
- Additional MGC “Catch up” meetings; now meeting monthly

# IEEE MOVE Global- Accomplishments by Year End?

- **Main Focus- New MOVE Locale Evaluation process & Start-up Checklist**
  - Focus for upcoming Catch Up meetings and In-Person meeting
  - New locale timeline and expectations
  - Create detailed checklist (outline vol trainings, P&P/Operations, STEM, Fundraising, secure Depl. partner, etc)
  - Evaluation committee: MGC members + locale members
- **Shared STEM repository - Connect Melody and Sadhana**
  - Sadhana to bring STEM kit to GHTC for demonstration
- **Marketing Strategy**
  - Form MGC action item and plan forward from Digital Pollen recommendations
  - Continue Phase II - Global Message (with Digital Pollen)
  - 2026 MOVE Global website
- **Renew USA/Puerto Rico Red Cross MOU**
- **Foundation:**
  - Account Structure- MOVE GLocal, MOVE USA, MOVE International
  - Discuss Donor packages: example: Sponsor MOVE USA Fuel for 1 yr= 25k ; Sponsor MOVE PR Storage Unit= 10K; Sponsor MOVE India STEM Events= 20K
