REPORT ON EVENT 23

TECHNICAL EVENT ON EMERGING TOPICS IN COMPUTATIONAL INTELLIGENCE AND ITS APPLICATIONS

Date: 05 May 2017

Main Coordinator: Prof.Shrikanth Tangade

Total Number of Participants: 30

About The Event:

Computational Intelligence is an emerging interdisciplinary technology focusing on Neural Networks, Connectionist Systems, Evolutionary Algorithms, Fuzzy Systems, Big-data, Multimedia Systems, IoT, Hybrid Intelligent Systems and Biologically Inspired Systems. The FDP is designed to include expert talks, hand-on sessions, panel discussion, etc.
