Glen - Thanks for your prompt reply.
We will categorize your panel as in
the a "re-activation mode" with you
continuing as the chair. - Jim

Hi Jim,

Believe it or nor I retired from the Air Force on 31 January 04 and returned
to the same office, same phone #, same e-mail address as a contractor three
weeks later.

Last year at the DASC, I had intended to solicit volunteers to re-staff the
panel but never got around to it. Since I'm still in the same business and
settled back down, I'd like to definitely get some new members this year.
Send me a "tickler" around mid-September...that will give us about a month
before the DASC to put something in place.

Hope all is well with you....

Regards,
Glen

Glen

When I spoke to you last year in Indianapolis,
you indicated that you would be leaving the
Air Force for private industry.

Consequently this E-Mail may not reach you.
If it does and you have an interest in
continuing the Avionics Technical Panel
as the Chair, please let me know.

If you don't have the interest and don't
have a recommended replacement, we can
list the panel as having an opening for
a new chair.

Regards,
Dr. Jim Huddle
VP, Technical Operations
Aerospace & Electronics Systems Society
