Welcome to PPS-2007!

The 34th IEEE International Conference on Plasma Science and the 16th IEEE International Pulsed Power Conference were combined into one conference and was held June 17-22, 2007, at the Albuquerque Convention Center in Albuquerque, New Mexico.

The DVD of the PPS-2007 Proceedings Papers have all shipped. If you registered for the conference and have NOT received your copy, please send an e-mail with your name and current address to: ppps2007@ece.unm.edu

The entire content of the DVD is available NOW online at:

<http://ieeepcc.omnibooksonline.com/>

The content is password protected and the username/password was e-mailed to conference registrants.

29 June - 2 July 2009

Oral & Poster Format

Oral Presentations

Oral presentations will include both invited and contributed papers. Invited talks will be 30 minutes and contributed talks 15 minutes including 5 minutes for questions. Oral presentations will be delivered using a computer and LCD projector. Talks will be loaded onto presentation computers a day ahead of each session. The expected applications are Microsoft PowerPoint and Adobe Acrobat (PDF files). Electronic files of presentations can be submitted on a CD or flash memory and will be transferred to our database at registration.

Posters

Posters should fit on 4' (four feet high) by 8' (eight feet wide) boards. You will need to bring a finished, printed version of your poster. We will not be able to print posters at the conference. There will be one poster session on each day of the conference. Each poster has been assigned a number, and you will need to mount your poster on the appropriately numbered board. (You can check the number by referring to the on-line program.) Posters must be mounted by 10 AM on the day of your relevant poster session, and taken down by 6 PM the same day. The posters should be attended during the poster session time, 1-3 PM each day.
