ICOPS 2008

35th IEEE International Conference on Plasma Science
June 15-19, 2008
Congress Center Karlsruhe, Germany

WELCOME TO ICOPS 2008 IN KARLSRUHE, GERMANY

We wish to extend a cordial welcome to ICOPS 2008, the 35th IEEE International Conference on Plasma Science, sponsored by the Plasma Science and Applications Committee of the IEEE Nuclear and Plasma Sciences Society. ICOPS 2008 will be held in Karlsruhe, Germany from June 15-19, 2008. The conference venue is the Congress Center in Karlsruhe.

This is the second time that the ICOPS Conference has been held outside the USA, following the initial event in Jeju, Korea, in 2003.

Plasma science covers a wide range of topics, both fundamental and applied. The technical program of the ICOPS 2008 Conference will cover progress in the seven conference topics (1) basic processes in fully and partially ionized plasmas, (2) microwave generation and plasma interactions, (3) charged particle beams and sources, (4) high energy density plasma applications, (5) industrial, commercial and medical plasma applications, (6) plasma diagnostics, (7) pulsed power and other plasma applications.

We would like to thank the many scientists and engineers who are attending the ICOPS 2008. A very strong technical program has been assembled with 619 papers from 42 countries demonstrating the broad international character of research in these fields. Plenary talks (7) will start every morning and afternoon, followed by five parallel sessions including invited (59) and contributed presentations (231). Poster sessions will be held on June 16, 17 and 18 (322 posters).

Wednesday (June 18) starts with the 2008 PSAC Award Plenary Talk on "Laser-Pumped X-Ray Free Electron Laser" given by Dr. P. Sprangle. On Thursday afternoon (June 19) there will be a laboratory visiting tour to the Research Center Karlsruhe.

If you enjoy browsing industrial exhibits, you will be pleased to learn that the poster sessions will be held in the Foyer which also serves as exhibit hall and we expect approximately a dozen industrial exhibitors to present their late technologies and products.

The minicourse for ICOPS 2008 also reflects the scientific environment in Karlsruhe: Microwave Processing of Materials.

Karlsruhe is a hospitable city, in the State of Baden-Württemberg, located in the upper Rhine valley between the wooded mountains of the Black Forest, the vineyards of the Palatinate (Pfalz), and the Vosges in France with a mild climate. Heinrich Hertz conceived and performed his brilliant fundamental experiments confirming Maxwell's theory at the University of Karlsruhe (1886–1888). The University of Karlsruhe (founded in 1825) has close scientific and academic relations to the Karlsruhe Research Center (Forschungszentrum Karlsruhe, founded in 1957) with the aim of merging to become the Karlsruhe Institute of Technology (KIT).

All of us who helped to organize ICOPS 2008 sincerely hope that all participants will enjoy the Conference. We also hope that participants will be able to enjoy the scenic Karlsruhe area. Finally, we are looking forward to a very successful ICOPS/SOFE 2009 which will be held from May 31 – June 5, 2009 in San Diego, California.

ICOPS 2008 will be held in the Congress Center Karlsruhe. Karlsruhe has approximately 300,000 inhabitants, and 200,000 of them only came to the city during the last century. The city was

founded when Margrave Karl Wilhelm built his palace here in 1715. His tomb on the market square is roofed with a large vaulted stone pyramid which is now Karlsruhe's emblem. From the palace, the streets of the inner-city fan out with the palace tower — which can be climbed — as their focal point. It was the intention of its founding father that the palace should be visible from any point in the city. Karlsruhe has plenty to offer: — from its elite university to the Research Center with the Karlsruhe Institute of Technology, the ZKM or the Art Gallery: Architecture, art, universities and colleges, future technologies, music, restaurants and a delight in just being alive all combine to make an impressive whole. Karlsruhe is blessed by the sun which you can enjoy in the palace gardens or in one of the innumerable beer gardens.

Karlsruhe is an inviting place to visit. The city with its radial layout features an interesting and unique connection of technology, art, education and culture. Enjoy the extensive cultural and gastronomic offerings in the second warmest city of Germany.

The Congress Center Karlsruhe has reserved a sufficient number of rooms at a reduced rate in hotels located within walking distance of the Congress Center Karlsruhe for ICOPS 2008 participants.

A link for booking and a hotel reservation form will be provided by January 2008 (see Conference Website). In case of questions, please contact:

INSTRUCTIONS FOR SPEAKERS

Oral presentations

All Conference Rooms for oral presentations will have a computerized LCD projector (data projector). Be present at least 10 minutes before the start of your session, and inform the session chairman of your arrival.

Time schedules for talks are as follows:

Plenary talks:	60 minutes (50 min. for presentation plus 10 min. for discussion)
Invited talks:	30 minutes (25 min. for presentation plus 5 min. for discussion)
Contributed talks:	15 minutes (12 min. for presentation plus 3 min. for discussion)

Strongly recommended

Speakers should bring only a Compact Disk or a USB-Memory-Stick with the presentation files in “.ppt” (PowerPoint) or “.pdf” (Adobe) format. Speakers should upload and preview their presentations on our presentation server in the “Prescreening Area” up to one hour before the session is scheduled to start. In each Conference Room an assistant and a notebook computer will be available for the presentations.

Prescreening Area

Location: Ground floor, near the Poster Session Area

Available time for pre-screening:

Sunday, June 15:	17:00 – 20:00
Monday, June 16:	07:30 – 16:00
Tuesday, June 17:	07:30 – 16:00
Wednesday, June 18:	07:30 – 16:00
Thursday, June 19:	07:30 – 09:00

Poster Presentations

Posters should have a maximum height of 1.2 m and width of 0.9 m (dimension in feet: 3.94 by 2.95). Posters should be set at 09:00 o'clock on the poster session day (Poster Session 1P on Monday, June 16 or Poster Session 2P on Tuesday, June 17 or Poster Session 3P on Wednesday, June 18) and taken down at 18:00 o'clock on the same day. The presenter is expected to remain at the poster during the time allotted for the poster session and the afternoon coffee break.

Times of the poster sessions:

Monday, June 16, at the following time:	13:00 - 14:00, 15:30 - 18:00
Tuesday, June 17, at the following time:	13:00 - 14:00, 15:30 - 18:00
Wednesday, June 18, at the following time:	13:00 - 14:00, 15:30 - 18:00

PUBLICATIONS

The Conference Record will be a USB memory stick. Manuscripts of plenary and invited oral presentations can be submitted for a special issue of the IEEE Transactions on Plasma Science to be published in early 2009.

OFFICIAL LANGUAGE

The official language of the Conference is English, which should be used in all printed materials, presentations, and discussions.

REGISTRATION DESK

Conference materials will be distributed at the Registration Desk in the Foyer of the Congress Center Karlsruhe.

The locations and opening hours of the desk are as follows:

Sunday, June 15:	17:00 – 20:00
Monday, June 16:	07:30 – 17:30
Tuesday, June 17:	07:30 – 17:30
Wednesday, June 18:	07:30 – 17:30
Thursday, June 19:	07:30 – 12:00

COFFEE BREAK

Coffee, tea, refreshments and snacks will be available in the Foyer of the Congress Center Karlsruhe during the coffee breaks.

INTERNET CAFE

10 PCs for Internet access, LAN ports and Wireless LAN will be provided in the Internet Café at the Congress Center Karlsruhe. Please bring your own PC if you wish to use the LAN ports. Internet access will be free for everyone attending the conference. The room will be open during the following dates and times:

Sunday, June 15:	17:00 – 20:00
Monday, June 16:	07:30 – 17:30
Tuesday, June 17:	07:30 – 17:30
Wednesday, June 18:	07:30 – 17:30
Thursday, June 19:	07:30 – 12:00

WIRELESS ACCESS AT THE CONGRESS CENTER KARLSRUHE

Wireless Internet access is provided at the Conference free of charge. When searching for W-Lan Accesspoints you may choose any list entry with leading text "ICOPS" followed by any combination of two numbers.

The corresponding SSIDs are: **ICOPSXX**

The Wireless Access is not encrypted.

EXHIBITION

An Exhibition will be held concurrently with the Conference in the Foyer of the Congress Center Karlsruhe during the following dates and times:

Monday, June 16:	08:00 – 18:00
Tuesday, June 17:	08:00 – 18:00
Wednesday, June 18:	08:00 – 18:00
Thursday, June 19:	08:00 – 12:00

BEST STUDENT PAPER AWARDS

The “Best Student Presentation Awards” were established in 2005 by the IEEE Nuclear and Plasma Sciences Society.

The purpose of these awards is to encourage both outstanding student contributions and greater student participation as principal or sole authors of papers as well as to acknowledge the importance of student contributions to the fields embraced by the NPSS umbrella.

The two best submissions (two awards) will receive cash awards of € 450 each and a Certificate. The two runners-up will receive a only certificate.

Any student who is the principal or sole author/researcher and the presenter of either an oral or poster paper at the ICOPS 2008 conference and who has been identified as an eligible student author will be eligible. If there is a tie, preference will be given 1) to IEEE NPSS members, 2) to IEEE members; 3) to non-IEEE members.

All candidates for selection must have identified themselves at the time of abstract submission. Upon notification of acceptance of the abstract, the award candidate should arrange to have his/her advisor or research supervisor provide an endorsement of the work to the awards committee (contact details will be provided at a later date). At the conference, the on-site awards committee will rank the papers for technical content and originality first. Other criteria such as graphic display and clarity of data presentation may be considered.

For information contact:

Monica Blank
Communication and Power Industries, Palo Alto, CA, USA
E-mail: monica.blank@cpii.com

STUDENT TRAVEL GRANT

A limited number of travel grants are available to encourage students who are IEEE members to attend ICOPS 2008. Applicants should submit the following information by 29 February 2008.

- Copy of submitted abstract
- IEEE membership number
- Proposed travel budget to the conference (cost sharing with other students is encouraged)

Two letters of recommendation, one of which is from the student’s advisor, stating the importance of the research to be presented. Application information should be sent to:

John Luginsland
Numerex
401 East State Street #304
Ithaca, New York 14850
Fax: 607-697-0212
E-mail: ICOPSstudentTravel@ieee.org

PLACEMENT CENTER

A job placement center will be set up at the conference. Individuals interested in employment opportunities in plasma physics and related areas should send their resumes (marked "ICOPS") to the address below. Employers with plasma-related technical positions available should contact

REGISTRATION

	In Advance On or before 30 April 2008	On Site After 30 April 2008
IEEE Members	€ 400	€ 500
Non-members	€ 550	€ 650
Student Members	€ 110	€ 125
Student Non-members	€ 150	€ 175
Retired / Unemployed	€ 110	€ 125

Registration will be done online at the Website. The online registration facility will be activated by January 2008.

Affiliate members of the IEEE Nuclear and Plasma Science Society (NPSS) qualify of the lower Members rate. For membership information, contact IEEE Member Services at 800-678-IEEE.

REGISTRATION CANCELLATION POLICY

Registrants wishing to cancel their registrations may receive a refund if requested in writing to Georg Müller at Forschungszentrum Karlsruhe (georg.mueller@ihm.fzk.de). If the request is received by 1st May 2008, it will be processed without charge. A cancellation fee of € 80 will accrue for refund requests received after that date. Refund requests will not be honored after 15 May 2008.

MINICOURSE

Microwave Processing of Materials

As part of the International Conference on Plasma Science 2008 (ICOPS 2008), a special two-day minicourse on microwave processing technologies will be offered on Thursday June 19th and Friday June 20th. ICOPS 2008 will be held at the Congress Center Karlsruhe and the minicourse will be held at the Research Center Karlsruhe, Germany. A group of international experts from academia and industry will provide a set of comprehensive lectures on industrial microwave processing and systems, avionic applications, antennas, energy efficient waveguides and transmission devices as well as computational methods.

Microwave processing is extremely important for a variety of industrial applications. These include high performance materials used in automotive, aerospace, electronic and medical applications, the chemical industry, environmental technologies, as well as advanced materials development and materials processing. This minicourse presents a unique opportunity to learn from leading, international microwave processing experts.

The course is structured in three sessions. A single session on the first day will cover some fundamentals of microwave processing technologies with a main focus on development, energy efficiency and devices.

Two parallel sessions will run on the second day. These sessions will focus on avionic and automotive applications as well as on simulations and dielectric measurements.

Who should attend

The course is designed for engineers/scientists from industry and research, technicians, and graduate level engineering/science students with an interest in applied microwave technologies and applications. At the same time, for the audience, the instructors will provide the most current information and will provide laboratory visits on the latest technology developments in their respective areas.

Minicourse Topics

- Industrial microwave systems
- Waveguides and transmission devices
- Avionic and automotive applications
- Microwave Chemistry
- Sintering of Materials
- Plasma and Nanomaterials Applications
- Dielectric measurements
- Electromagnetic Modelling and Simulation

More Information

Further information on minicourse registration fees, student tuition grants, and instructors will be posted on the conference website shortly.

ICOPS 2008 MINI COURSE SCHEDULE

Session 1: Basics, Components and Technologies • June 19th, 2008		
08.00–09.30	Industrial Microwave Processing Introduction and Overview	L. Feher
09.30–11.00	Electromagnetic Heating Processing and Material Effects	M. Willert-Porada
11.00–12.30	Industrial Microwave Systems and Applications in Japan	M. Sato
12.30–13.00	Lunch	
13.30–15.00	Waveguides, Antennas and Dielectric Sensoring	J.M. Catalá
15.00–16.30	Microwave Plasma and Polymer Applications	R. Emmerich

Session 2: Dielectrics, Chemistry and Application • June 20th, 2008		
08.00–09.30	Dielectric Measurements and Methods	J. Akhtar
09.30–11.00	Microwave Curing of Resins and Composites	R. Day
11.00–12.30	Resin Chemistry and Microwave Enhancements	M. Henningsen
12.30–13.00	Lunch	
13.30–15.00	Microwave Treatment of Ceramics and Glasses	C. Leonelli
15.00–16.30	Microwave Plasma Processing of Nano-Materials	D. Szabó
17.00–18.00	Visit to HEPHAISTOS-Experimental Center	L. Feher

How to Register

The fee for the minicourse is € 400. For students, there is a reduced rate of € 200. This includes lunch and coffee breaks, 2 full day instruction from microwave processing experts plus course materials.

It is possible to register for the minicourse exclusively! It is not mandatory to sign up for the ICOPS conference to benefit from the minicourse.

Don't miss this unique opportunity to learn from internationally-recognized microwave processing experts. Register online at the ICOPS 2008 conference website. Registrations accepted through May 31, 2008.

Go to www.icops2008.org and choose "Registration". Select "Minicourse Registration" under the Fee section.

If you require more information about the course content, please contact lambert.feher@ihm.fzk.de.

If you require more information about registration, please contact Martina Huber at martina.huber@ihm.fzk.de.

Location

The minicourse will be held at the Congress Center Karlsruhe.

To book accommodation for a hotel, mention ICOPS 2008 to benefit from the reduced conference rate. For details on booking accommodation, please visit the ICOPS 2008 website — www.icops2008.org and click on accommodation/hotel booking link.

SOCIAL EVENTS

Welcome Reception

A welcome reception will be held Sunday 15 June from 5 to 9 pm. There is no charge for conference registrants and companions.

Reception at the Karlsruhe City Hall

At Monday 16 June evening there will be a reception by the mayor at the City Hall in Karlsruhe. There is no charge for conference registrants and companions.

In 1805, the city fathers decided to build a new Town Hall. Called upon to assist in putting the project into practice was Friedrich Weinbrenner who planned to include also the meat depot and the salt and flour hall inside the new building. Thus, facing the Evangelical Municipal Church, a building was constructed in Weinbrenner's typical neoclassical style.

Wine Tasting Evening

A wine tasting evening with local food will be organized at Tuesday 17 June at the vineyard Wilker in the Palatinate (Pfalz). Transportation will be by buses. There is no charge for registrants and companions.

Banquet

The conference banquet will be held Wednesday (18 June) evening, in the Schwetzingen Palace. A limited number of tickets is available. A nominal payment of €35 will be charged for conference registrants and companions which includes bus transportation from Karlsruhe to Schwetzingen and back. Tickets can be purchased during on-line registration and at the Registration Desk on a first-come basis.

LABORATORY VISIT

On Thursday afternoon (June 19th) **three visiting tours (A, B and C)** to the **Forschungszentrum Karlsruhe** will be organized. Forschungszentrum Karlsruhe is one of the biggest science and engineering research institutions in Europe and funded jointly by the Federal Republic of Germany and the State of Baden-Wuerttemberg. Its research and development program is embedded in the superordinate program structure of the Hermann von Helmholtz Association of National Research Centers and concentrates on the five research areas of Structure of Matter, Earth and Environment, Health, Energy, and Key Technologies.

Within groups of up to 25 participants you will be guided through 4 different laboratories. At the end of the tour there will be a short come together where drinks and snacks will be served.

You will be picked up by bus in front of the Conference Center at 14 o'clock and the way back will start at about 18:30 o'clock.

If you intend to participate you should indicate your interest in the registration form. This event is free of charge and will be limited to 300 participants on a first serve come basis.

You may choose one of the following tours at the registration desk.

Tour A:

GESA experiment for surface modification of materials by pulsed electron beams.

The Karlsruhe Microwave Plasma Process (**KMP Process**) for the production of nanoparticles with very narrow particle size distribution.

The Karlsruhe Tritium Laboratory (**TLK**) which develops key technologies for the deuterium / tritium fuel cycle of future fusion reactors.

The **KATRIN** experiment is designed to measure the mass of the electron neutrino directly with a sensitivity of 0.2 eV.

Tour B:

FRANKA facilities for fragmentation and separation of compound materials and minerals with pulsed electric discharges.

KEA experiments for a big scale utilization of pulsed power for electroporation of plant cells.

Test facility **TOSKA** for magnets utilized in fusion reactors for magnetic confinement.

Gyrotron laboratory for the development of high power microwave sources for plasma heating in fusion reactors.

The Synchrotron Light Source **ANKA**.

Tour C:

VERENA is an installation to convert biomass from agriculture and food industry into a hydrogen-rich product gas.

FR2 is the first genuine German nuclear research reactor which is located on the premises of the Research Center Karlsruhe. It was built from 1957 to 1960 and went critical for the first time in March 1961. The FR2 was finally shut down in December 1981.

MEKKA aims to investigate liquid metal flows relevant for fusion applications, where the magnetic field that confines the plasma is very strong.

BETINA is a research project on alloying of Beryllium and Titanium nanopowders.

COMPANION ACTIVITIES

The following tours for accompanying persons will be organized:

Monday 16 June: Historical Walk in Karlsruhe

We offer a guided tour of the city with a visit to the palace gardens, botanical gardens, orangery, and buildings along the Circle. The two highest German courts, the Federal Constitutional Court and the Federal Supreme Court, are located in Karlsruhe.

Tuesday 17 June: Sightseeing in Speyer

The tour will lead you to the venerable imperial town of Speyer on the river Rhine. The imperial cathedral, the construction of which started before 1030, is one of the most significant Romanesque buildings in Germany. The crypt that has been preserved nearly unchanged accommodates the graves of eight German emperors and kings. In 1981, the cathedral was included in the UNESCO list of world heritage sites. One of the most beautiful and highest town towers of Germany is the “Altpörtel”. A lunch and later

walk on Speyer’s shopping mall, the Maximilianstrasse, will complete your visit of the vital and hospitable town of Speyer.

Wednesday, 18 June: Heidelberg Tour

The tour will start with sightseeing at the castle of Heidelberg and the apothecary museum. Experience the Electors’ residence at the height of their power, and its destruction in the year 1689. Hear the fascinating story of the great love between the Winter King and the “Winter Queen”, Elizabeth Stuart, about the wine-bibbing dwarf Perkeo, and about Elisabeth Charlotte of the Palatinate, Duchess of Orléans, famous for her candid letters from the Sun-King’s court. Enjoy the historical charm of the romantic ruins above the Neckar River. A lunch and a walk to the shipping pier for a round trip on the Neckar river including coffee and cake make this tour to a highlight.

FREE INTRODUCTORY IEEE MEMBERSHIP

In order to encourage participation in the activities of the IEEE and the Plasma Science and Applications Section of the IEEE Nuclear and Plasma Science Society, free half-year memberships will be given to all interested non-IEEE members (including students) registering for this conference. This free half-year membership includes a subscription to IEEE Spectrum and Transactions on Plasma Science. The regular cost of a full year's membership can be found at www.ieee.org.

Membership includes:

1. Subscription to Transactions on Plasma Science, a journal devoted to all aspects of plasma science and technology.
2. Subscription to IEEE Spectrum, a magazine covering engineering topics of general technical, economic, political, and social interest.
3. Subscription to Society Newsletter with news items about the Conference on Plasma Science, the Particle Accelerator Conference, and the Symposium on Fusion Engineering.
4. Eligibility to participate in a broad range of IEEE activities.
5. Opportunities for IEEE educational services such as video-conferences and individual learning packages.

To receive our free membership, fill out an application at the Registration Desk or call 800-678-IEEE.

GETTING TO KARLSRUHE (more details see www.fzk.de/icops2008)

Travel by plane

Frankfurt Airport

Frankfurt Airport is located directly adjacent to the A 5 motorway, Frankfurt — Karlsruhe, about 1 hour and 15 minutes by car from Karlsruhe. The Deutsche Bahn AG offers rail connections to and from Karlsruhe from Frankfurt Airport and from Frankfurt Main Station. The Deutsche Bahn AG gives information about arrival and departure times.

Stuttgart Airport

Stuttgart Airport is situated directly adjacent to the A 8 motorway, Munich — Karlsruhe. About 1 hour by car from Karlsruhe. There is a local rail connection from Stuttgart Airport to Stuttgart Main Station.

Travel by train

Karlsruhe forms an important junction of the Deutsche Bahn (German national railway) and is situated directly on the ICE (high-speed train) route of Hamburg – Frankfurt – Basel. The east-west axis of Karlsruhe – Stuttgart – Munich starts here.

Travel by car

Karlsruhe lies directly at the A 5 motorway. The city center is less than ten minutes drive away from the exits for “Durlach” and “Karlsruhe Mitte” either via the Durlacher Allee or the round the southern by-pass.

A routing system — green signs with white lettering — assists new arrivals to find their booked or chosen hotel. In the same way, the parking guide system leads the way to the many multi-story car parks in the city center.

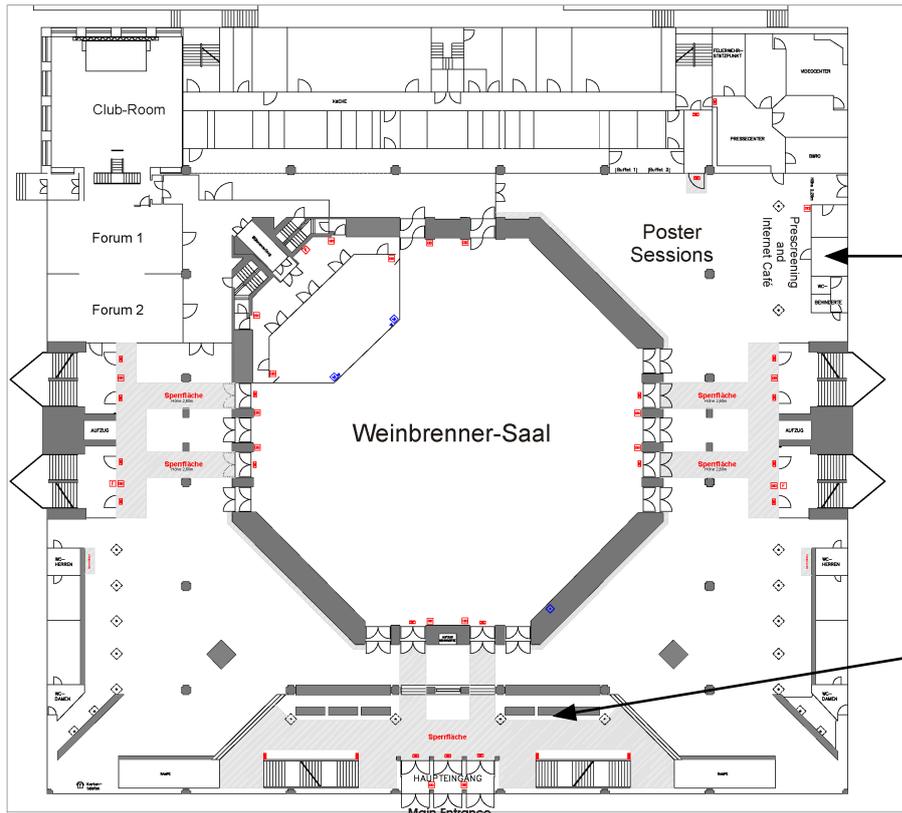

Map of Karlsruhe with Congress Center (KMK) and ICOPS Hotels

Free transport with the Karlsruhe Tram System (KVV) in the full KVV network is included in the conference fee for registered participants.

Your conference badge will serve as the ticket, which is valid from Sunday, June 15 to Friday, June 20.

Accompanying persons may purchase a tram ticket at the registration desk for € 20.

Poster Session 1P (Monday, June 16, 13:00–14:00 • Poster Area – Foyer)

Basic Phenomena in Plasmas

Chair: Amnon Fruchtman, Holon Institute of Technology, Israel

- 1P1** **Investigations of Time-Averaged Electron Energy and Electron Density for Different Radii and Gas Pressures in Capacitively Coupled Neutral Loop Discharges (CCP-NLD)**
M. Vural, F. Sirin, R.P. Brinkmann
Theoretical Electrical Engineering, Ruhr-University, Bochum, Germany
- 1P2** **Universal Aspects of Pattern Formation in Planar Gas-Discharge Systems**
H.-G. Purwins
Institut Für Angewandte Physik, University of Münster, Germany
- 1P3** **On the Structure of Positive Streamers in Air Between Point-To-Plane-Electrodes**
T.M.P. Briels¹, S. Nijdam¹, E.M. van Veldhuizen¹, U. Ebert^{1,2}
¹Dept. Applied Physics, Technische Universiteit Eindhoven, The Netherlands
²Centrum Wiskunde & Informatica Amsterdam, The Netherlands
- 1P4** **Electrode Sheath Model for an Argon Free Burning Arc Discharge at Very High Pressure and Low Intensity**
E. Izquierdo, J. Gonzalez-Aguilar, L. Fulcheri
Ecole des Mines de Paris, Sophia-Antipolis, France
- 1P5** **Charge Exchange and Ionization in Hydrogen Atom-Fully Stripped Ion Collisions in Debye Plasmas**
H. Zhang¹, J.G. Wang¹, B. He¹, Y.B. Qiu¹, R.K. Janev²
¹Institution of Applied Physics and Computational, Beijing, P.R. China
²Macedonian Academy of Sciences and Arts, Skopje, Macedonia
- 1P6** **Nonlinear Dynamics of Fluctuations in the Presence of Sheared Parallel and Perpendicular Flows in a Magnetized Laboratory Plasma**
M. Gilmore, L. Yan, S. Xie, C. Watts, A.G. Lynn
University of New Mexico, Albuquerque, NM, USA
- 1P7** **Spectral Investigation of a Fireball in Low-Temperature Argon Plasma**
S.O. Gurlui¹, D.G. Dimitriu¹, C. Ionita², R.W. Schrittwieser²
¹Department of Physics, Alexandru Ioan Cuza University, Iasi, Romania
²Institute of Ion Physics and Applied Physics, Leopold-Franzens University, Innsbruck, Austria
- 1P8** **Complex Oscillations Induced by the Nonlinear Dynamics of the Fireballs in Plasma**
O. Niculescu, D.G. Dimitriu
Department of Physics, Alexandru Ioan Cuza University, Iasi, Romania
- 1P9** **Energy Transfer From Ar Metastable Atom to N₂ Molecule in DBD-Driven Microplasma Jet**
H. Motomura, H. Matsuba, T. Nagahama, M. Jinno
Department of Electrical and Electronic Engineering, Ehime University, Matsuyama, Japan

Poster Session 1P (Monday, June 16, 13:00–14:00 • Poster Area – Foyer)

Space Plasmas and Partially Ionized Plasmas

Chair: Reinhard Schlickeiser, Ruhr-University Bochum, Germany

- 1P10** **Two-Dimensional Fluid Simulations for the Inductively Coupled Acetylene/Hydrogen Plasmas**
Y. Hu, T.-L. Lin, Y.-M. Chiu
Department of Engineering and System Science, National Tsing Hua University, Hsinchu, Taiwan
- 1P11** **On Diagnostics of Space Plasma with Tubular Dipole Antenna**
A. Kiraga
Space Research Center, Warsaw, Poland
- 1P12** **A Correlative Study on the Last Four Solar Cycles**
K.A. Firoz
Department of Nuclear and Sub-Nuclear Physics, University of Pavol Jozef Šafarik, Košice, Slovakia

- 1P13 Study of Solar Wind Plasma Structure and Their Association with Geomagnetic Field Variation**
S.K. Mishra, D.P. Tiwari
Dept. of Physics, A.P.S. University, Rewa, India
- 1P14 Simulating Auroral Kilometric Radiation Emission Mechanisms Through a 3D PiC Code**

Oral Session 3B (Tuesday, June 17, 09:30–12:00 • Room 2.05)

Fast Wave Devices II

Chair: Monica Blank, CPI Palo Alto, CA, USA

- 3B1 Material Aspects of High Power Microwave Windows (Invited Keynote)**
 09:30 V.V. Parshin¹, A.L. Vikharev¹, R. Heidinger², A. Meier², T.A. Scherer², B.M. Garin³, J.M. Dutta⁴
 –10:00 ¹Institute of Applied Physics of Russian Academy of Sciences, Nizhny Novgorod, Russia
²Research Center Karlsruhe (FZK), Institute for Materials Research I, Germany
³Institute of Radio Engineering and Electronics of Russian Academy of Sciences, Moscow Region, Russia
⁴Department of Physics North Carolina Central University, Durham, NC, USA
- 3B2 Microwave Testing of a CVD Diamond Torus Window Prototype for ITER**
 10:00 T.A. Scherer¹, R. Heidinger¹, A. Meier¹, K. Takahashi², K. Kajiwara², K. Sakamoto²
 –10:15 ¹Research Center Karlsruhe (FZK), IMF, Germany
²Japan Atomic Energy Agency, Naka, Japan
- 3B3 Measurements and Analysis of Advanced Field Emission Cold Cathodes**
 10:15 X. He, J. Scharer, J.H. Booske, N. Sule, S. Sengele
 –10:30 University of Wisconsin-Madison, WI, USA
- 3B4 Effect of Ion Bombardment on Emission Characteristics of Gyrotron Cathodes**
 10:30 O.I. Louksha¹, G.G. Sominski¹, D.B. Samsonov¹, G. Dammertz², B. Piosczyk², M. Thumm²
 –10:45 ¹St. Petersburg State Polytechnical University, Russia

- 3B9 Control of Sase Power and Enhancement of FEL Coherence by Plasma Wave Dilation**
 11:45 A. Gover
 –12:00 Tel-Aviv University, School of Electrical Engineering, Israel

Oral Session 3C (Tuesday, June 17, 09:30–12:00 • Hebel Saal)*Plasma Lasers and Switching*Chair: *Andreas Görtler, Coherent GmbH, Munich, Germany*

- 3C1 Excimer-Laser-Driven EUV Plasma Source for Single-Shot Lithography (Invited Keynote)**
 09:30 P.D. Lazzaro
 –10:00 *ENEA Frascati Research Centre, Italy*
- 3C2 Technical Realisation of Excimer Lasers - an Overview**
 10:00 C.F. Strowitzki, A. Görtler, A. Matern
 –10:15 *Coherent GmbH, München, Germany*
- 3C3 Modeling of Dynamic Effects in a Laser-Driven Semiconductor Switch of Powerful Microwave Radiation**
 10:15
 –10:30 M.L. Kulygin, G.G. Denisov, V.V. Kocharovskiy
Institute of Applied Physics Russian Academy of Sciences, Nizhny Novgorod, Russia
- 3C4 Optical and Electrical Investigations of a High Power Lorentz Drift Based Gas Discharge Switch**
 10:30
 –10:45 M. Iberler, K. Esser, A. Fedjuschenko, C. Hock, J. Jacoby, B. Koubeck, B. Klump, B.J. Lee, J. Otto, M. Pfaff, T. Rienecker, A. Schoenlein
Institute for Applied Physics, J. W. Goethe University Frankfurt, Germany
- 3C5 Jitter and Recovery Rate of a 50 kV, 100 Hz Triggered Spark Gap with High Pressure Gas Mixtures**
 10:45
 –11:00 Y. Chen, J.J. Mankowski, J.W. Walter, J.C. Dickens
Texas Tech Center for Pulse Power and Power Electronics, Lubbock, TX, USA
- 3C6 High-Speed Motion Analysis of Surface Melting Phenomena of High-Current Vacuum Arcs**
 11:00 N. Wenzel¹, W. Wietzorek¹, W. Hartmann¹, A. Lawall², R. Renz²
 –11:15 ¹*Siemens AG, Corporate Technology, Erlangen, Germany*
²*Siemens AG, Power Transmission and Distribution, Berlin, Germany*
- 3C7 Pulse Shaping Experiments on the RITS-6 Accelerator**
 11:15 J.J. Leckbee¹, B.V. Oliver¹, S. Portillo¹, K. Hahn¹, M.D. Johnston¹, V. Bailey², P. Corcoran², D.L. Johnson²,
 –11:30 I.D. Smith²

- 3C8 Simulation of Switching Behavior of Free Burning Electric Arcs**
 11:30 Y. Lee¹, M. Specht², U. Riechert², M. Kudoke²
 –11:45 ¹*ABB Switzerland Ltd., Corporate Research, Baden-Dättwil, Switzerland*
²*ABB Switzerland Ltd., High Voltage Products, Zürich, Switzerland*
- 3C9 Numerical Simulation of Electrode Erosion Phenomenon in Low Pressure Subnanosecond Spark Gaps**
 11:45
 –12:00 E. Hashemi, K. Niayesh, E. Agheb, J. Jadidian, A.A. Shayegani-Akmal
School of Electrical and Computer Engineering, University of Tehran, Iran

Oral Session 3D (Tuesday, June 17, 09:30–12:30 • Mombert Saal)

Bioelectrics

Chair: Wolfgang Frey, Research Center Karlsruhe, Germany

- 3D1 Electrochemotherapy: A New Treatment for Cutaneous and Subcutaneous Tumor Lesions (Invited Keynote)**
09:30
–10:00 L.M. Mir
Institute Gustave-Roussy, University Paris-Sud, Villejuif, France
- 3D2 Double Pulse Approach of Eletrogenotherapy: an Analysis at the Single Cell Level (Invited Keynote)**
10:00
–10:30 E. Bellard, J. Teissié
IPBS Universite P Sabatier CNRS, Toulouse, France
- 3D3 Focusing Impulse Radiating Antenna for Medical Imaging**
10:30
–10:45 K.H. Schoenbach, S. Xiao, J.T. Camp, J.F. Kolb
Frank Reidy Research Center for Bioelectrics, Old Dominion University, Norfolk, VA, USA
- 3D4 Plasma Decontamination at Atmospheric Pressure - Basics and Applications**
10:45
–11:00 K.-D. Weltmann, R. Brandenburg, J. Ehlbeck, R. Foest, E. Kindel, M. Stieber, T.v. Woedtke
INP Greifswald, Germany
- 3D5 Pulsed Electric Fields (PEF) Applications in Food Processing - Process and Equipment Design and Cost Analysis.**
11:00
–11:15 S. Toepfl, V. Heinz
German Institute of Food Technologies (DIL), Quakenbrueck, Germany
- 3D6 Sterilization of Bacterial Spore Using Intense Nanosecond Pulsed Electric Fields with a Pressurized Flow System**
11:15
–11:30 S. Katsuki¹, J. Choi¹, T. Namihira¹, H. Akiyama¹, H. Seta², H. Matsubara², T. Saeki²
¹*Kumamoto University, Japan*
²*Suntory Limited, Kawasaki, Japan*
- 3D7 Improving Germination Rate of Soybeans as a Biofuel Resource**

Poster Session 2P (Tuesday, June 17, 13:00–14:00 • Poster Area – Foyer)

Computational Plasma Physics

Chair: Claus-Dieter Munz, University of Stuttgart, Germany

- 2P1 Analysis and Simulation of Pseudospark Discharge**
X. Gu, L. Meng, Y. Sun, X. Yu, G. Song, J. Yang
School of Physics Electronics, University of Electronic Science and Technology of China, Chengdu, China
- 2P2 Stochastic Heating in Capacitively Coupled Plasmas**
M. Bayrak, R.P. Brinkmann
Department for Theoretical Electrical Engineering, Ruhr University, Bochum, Germany
- 2P3 Fully Electromagnetic Particle-In-Cell Simulations of a Deuterium Gas Puff Z-Pinch**
D.R. Welch¹, D.V. Rose¹, W.A. Stygar², R.J. Leeper²
¹*Voss Scientific, Albuquerque, NM, USA*
²*Sandia National Laboratories, Albuquerque, NM, USA*
- 2P4 Kinetic Simulations of Neutral Loading Processes in Electron Cyclotron Resonance Ion Sources (ECRIS)**
P. Messmer, P.J. Mullaney, D. Fillmore
Tech-X Corporation, Boulder, CO, USA
- 2P5 Comparisons and Applications of the Full Two-Fluid Plasma Model to Asymptotic Two-Fluid Models**
B. Srinivasan, U. Shumlak
Aerospace and Energetics Research Program, University of Washington, Seattle, WA, USA
- 2P6 Vlasov Simulation of Electron Hole Propagation in Plasmas with Super-Thermal Particles**
H. Abbasi, N. Javaheri
Amirkabir University of Technology, Tehran, Iran
- 2P7 Vlasov Simulation of Self Induced Transparency in Laser-Plasma Interaction**
H. Abbasi, S. Rahimi
Faculty of Physics, Amirkabir University of Technology, Tehran, Iran

Poster Session 2P (Tuesday, June 17, 13:00–14:00 • Poster Area – Foyer)

Fast Wave Devices

Chair: Jean-Philippe Hogge, EPFL Lausanne, Switzerland

- 2P8 Preliminary Numerical Study of the Beam Neutralization Effect in the EU 170 GHz, 2 MW Coaxial Gyrotron**

Oral Session 7B (Thursday, June 19, 09:30–12:00 • Room 2.05)*Microwave Systems and Microwave Plasma Interaction*Chair: *Gregory Denisov, Institute of Applied Physics, RAS, Russia*

- 7B1 Source of Multicharged Ions and Extreme Ultraviolet Radiation Based on Plasma Sustained by Gyrotron Radiation (*Invited Keynote*)**
 09:30
 –10:00 A. Vodopyanov
Institute of Applied Physics, RAS, Nizhny Novgorod, Russia
- 7B2 Microwave Resonance Discharge as a Source of UV Radiation**
 10:00 E.M. Barkhudarov¹, I.A. Kossyi¹, M.A. Misakyan¹, N.V. Denisova²
 –10:15 ¹*A.M. Prokhorov General Physics Institute of RAS, Moscow, Russia*
²*Institute of Theoretical and Applied Mechanics of SD RAS, Novosibirsk, Russia*
- 7B3 Low Power Microwave Conductivity of Atmospheric Pressure Plasma**
 10:15 H.-E. Porteanu, S. Kühn, R. Gesche
 –10:30 *Ferdinand-Braun-Institut für Höchstfrequenztechnik, Berlin, Germany*
- 7B4 Development of Filamentary Structure of Atmospheric Breakdown on 170 GHz Gaussian Beam**
 10:30
 –10:45 Y. Oda¹, K. Kajiwara¹, K. Takahashi¹, A. Kasugai¹, K. Sakamoto¹, K. Komurasaki²
¹*Japan Atomic Energy Agency, Naka, Japan*
²*The University of Tokyo, Kashiwa, Japan*
- 7B5 Measurements of 193 nm Laser Air Breakdown and Scaling to the Microwave Regime**
 10:45 M. Thiyagarajan, J. Scharer, J. Way, J. Hummelt
 –11:00 *University of Wisconsin-Madison, Madison, WI, USA*
- 7B6 Localised Defects in One-Dimensional Periodic Structures and Relative Phase Measurements of the Radiation Passed Through the Periodic Lattice**
 11:00
 –11:15 I.V. Konoplev, P. MacInnes, A.W. Cross, K. Ronald, A.D.R. Phelps
SUPA, University of Strathclyde, Glasgow, UK
- 7B7 Microwave Curing of Composite Structures at HEPHAISTOS Experimental Centre (HEC)**
 11:15 L. Feher¹, V. Nuss¹, R. Wiesehöfer²
 –11:30 ¹*Research Center Karlsruhe (FZK), IHM, Germany*
²*Vötsch Industrietechnik, Reiskirchen, Germany*
- 7B8 Efficiency Enhancement of Gyrotron Based Setups for Technological Applications**
 11:30 M.M. Morozkin, Y.V. Bykov, G.G. Denisov, M.Y. Glyavin, A.G. Luchinin, D.I. Sobolev
 –11:45 *Institute of Applied Physics, Russian Academy of Sciences, Nizhny Novgorod, Russia*
- 7B9 Lab-Scale System for Microwave and Plasma Experiments**
 11:45 N. Tran
 –12:00 *Swinburne University of Technology, Australia*

Oral Session 7C (Thursday, June 19, 09:30–12:00 • Hebel Saal)*Plasmas for Lighting and Flat-Panel-Displays II*Chair: *Karlheinz Blankenbach, University of Applied Sciences, Pforzheim, Germany*

- 7C1 Modeling of a Projector Lamp Operated by a U-Drive Pulse Power Source**
 09:30 *K.C. Paul, T. Takemura, T. Hiramoto, T. Igarashi*
 –09:45 *R&D Center, Ushio Inc., Gotenba, Japan*
- 7C2 Temperature Determination From Self-Reversed Resonance Lines**
 09:45 *S. Franke, H. Schneidenbach*
 –10:00 *Leibniz-Institute for Plasma Science and Technology, Greifswald, Germany*
- 7C3 A THz Interferometer for Measurement of Plasma Density in High Intensity Discharge Lamps**
 10:00 *A. Kieckhafer, J. Curry*
 –10:15 *National Institute of Standards and Technology, Gaithersburg, MD, USA*
- 7C4 Breakdown Characteristics of Metal Halide Plasma Lamps**
 10:15 *S. Peters¹, M. Kettlitz¹, M. Wendt¹, A. Kloss²*
 –10:30 *¹INP Greifswald, Germany*
²OSRAM GmbH, München, Germany
- 7C5 The Effect of Hydrogen Iodide on the Ignition of Hg-Free Metal Halide Lamps**
 10:30 *E.G. Estupinan, R.M. Pereyra, W.P. Lapatovich*
 –10:45 *Central Research and Services Laboratory, Osram Sylvania, Beverly, MA, USA*
- 7C6 Vacuum Ultraviolet Radiation Source Based on the 2nd Emission Continuum of the Neon Excimer ($\lambda \sim 84$ nm) Generated by a “Windowless” Dielectric Barrier Discharge**
 10:45 *R.J. Carman, D.M. Kane, B.K. Ward*
 –11:00 *Physics Dept, Macquarie University, Sydney, Australia*
- 7C7 High Pulse Radiating Power Excilamps**
 11:00 *V.F. Tarasenko, M.V. Erofeev, M.I. Lomaev, D.V. Rybka*
 –11:15 *High Current Electronics Institute, Tomsk, Russia*
- 7C8 Time-Resolved Observation of Laser-Assisted Discharge Plasmas for EUV Sources**
 11:15 *S. Katsuki, N. Tomimaru, T. Sakugawa, H. Akiyama*
 –11:30 *Kumamoto University, Japan*
- 7C9 Unified Modelling of Near-Electrode Non-Equilibrium Layers in High-Pressure Arc Discharges**
 11:30 *N.A. Almeida¹, M.S. Benilov¹, G.V. Naidis²*
¹Departamento de Física, Universidade da Madeira, Funchal, Portugal
²Institute for High Temperatures RAS, Moscow, Russia
- 7C10 UV Light Sources with Microwave Excited Molecular Gas Plasmas**
 11:45 *J.-S. Oh¹, B.K. Pramanik², K. Kawamura², A. Hatta²*
