**Program:** Motor Efficiency – Why is it important?

**Speaker:** Brad Santa, Shermco Industries

**About the Speaker:** Brad has worked in the Electrical / Mechanical testing and repair business for 38 years. Starting out, he completed a 4 year Apprenticeship earning a Technical Degree in Electric Motor Repair, before working his way up as a Field Service Technician. Working in the field, he had the opportunity of traveling to different customer's site gaining a vast amount of hands on experience in the industry. His travels have taken him throughout the United States, Central America, South America, Europe and the Middle East, testing, learning and performing repairs on large AC generators and motors.

Some of Brad's other studies and training includes: ISO Internal Auditor Training certified with Lloyds Registrar KSA, Deming Training Indiana Vocational Technical College, I.R.D. Mechanalysis Columbus, Ohio, Multi-Amp Institute Dallas, Texas, Supervisory Training Indiana Vocational Technical College, SKF Bearing Rebuilder Certified Dallas, Texas and various OEM training on motors and generators.

Brad moved into the management side of the repair business several years ago, working for different repair facilities and most recently with Shermco Industries as the Repair Shop Manager for 5 ½ years. Then last year Brad moved into the Sales Group for Shermco which enables him to interface with customers and the ability to get out and perform presentations concerning maintenance, testing and repair.

**Presentation Abstract:** Please see attached abstract.
