Conversation: P67 Report

Oleg

Jim's e-mail has reminded me that I need to report on P67 standard and where it's at right now. It is now finished according to Jennie Steinhagen from the IEEE Standards Association, who replied by e-mail to me a few days ago after I asked about the status of P67. She says that IEEE Std 67-2005 published on May 8, 2006. She also said that she would PDF the official version and send it to myself and the working group members by the end of this week. So I expect to see it today or tomorrow.

I also cannot attend the PES again this year because I am again off to Australia for most of June on business. Please accept this communication as my report to you on the status of P67. I now have a yearly piece of business in OZ that always goes on when the PES is happening, so I am not sure when I will be able to attend next. My boss seems to think making money instead of spending it is the right thing to do. ...go figure!

Regards, Geoff
