

# MINUTES FOR INTERRUPTER SWITCH TASK FORCE

Asheville, NC  
May 4&6, 2009

The group did introductions and reviewed the Patent Disclosure Slides.

## Discussion of Interrupter Switch Product Code

- IEEE 1247 switches
- C37. Interrupter Switch Items removed during consolidation C37.30.1
- Conflicting Temperature Rise limits
- Potential Scope and Purpose were discussed and IEEE1247 Scope Purpose were reviewed. Due to the similar nature of IEEE1247 and C37.3x Scopes and Purposes it was decided review materials contained in both IEEE1247 and C37.3X at the fall meeting in Denver before developing this item.

Task Force discussed possible avenues to proceed:

- Move materials removed in consolidation of C37.30.1 into IEEE1247 or
- Pursue the C37.30.3 as a new document potentially combining the materials removed in C37.30.1 and any product code items in IEEE1247

A motion was made by Randy Dotson and second by Chris Ambrose to continue with C37.30.3 approach to the document. After much discussion, motion approved unanimously.

Meeting adjourned.
