

IEC SC17A MT47/IEEE WG C37.60/IEC 62271-111 Automatic Circuit Recloser Standard

May 1, 2012 - St. Pete, Florida

Introductions

The Working Group for the revision of C37.60-2003 held its 15th meeting at 2:00 PM on May 1, 2012 in St. Pete, Florida, USA.

The agenda was reviewed and approved followed by introductions.

Attendance included 21 members of the Dual Logo Maintenance Team and 7 guests. Fourteen members of the DLMT were absent or excused. Refer to Annex A for the attendance list.

Minutes of the previous meeting were not discussed since they had been approved by correspondence.

Dual Logo Maintenance Team (DLMT) Timeline

The last milestone for the project is the final ballot, final draft for international standard (FDIS) by IEC. This ballot has been delayed by the IEC Central Office while they perform a detailed editorial review. The ballot is expected to be opened by the first of June.

Documents available on IEEE web site

All documents from the WG are posted on the IEEE web site. The Chairman updated the list in March and deleted all documents dated prior to 2010.

Review of Melbourne Plenary meeting IEC SC17A

At the meeting held in October 2011, the decision was made to proceed with the FDIS ballot. However, due to the number of CDV comments that were "held for next revision", the DLMT was asked to start work on the next revision as soon as possible. The plan to initiate a new joint project for the revision work will have to wait until the FDIS ballot is complete.

Review results of IEEE ballot

The 3rd and 4th recirculation ballots in IEEE were held in January/February 2012 and the results summarized:

97% ballots returned

96% approval

Next Meeting and Adjournment

Since the IEC FDIS ballot will mark the final step in the project, the next meeting, if one is required, will be at the call of the Chair.

The meeting was adjourned at 2:20 PM.

.

David T. Stone

Working Group Chairperson, C37.60 and

Convenor for IEC MT47

Reclosers and Other Distribution Switchgear Subcommittee

May 9, 2012
