

ADSCOM Report

Spring 2019

1. STANDARDS COORDINATORS REPORT

The rule changes for the document maintenance cycle have eliminated the reaffirmation process. The documents now have a 10-year life. Activity to revise documents must occur during that time period. The document cannot be reaffirmed as a stop-gap while the revision takes place.

2. DOCUMENT STATUS

There are 2 Switchgear documents scheduled for Administrative Withdrawal on 31 December 2019 and 1 document allowed to expire in 2018 that requires revision and reinstatement.

Please note that having an active PAR does not extend the life of the standard.

These documents must be submitted to REVCOM no later than 17 September 2019.

ADSCOM

C37.301-2009 IEEE Standard for High-Voltage Switchgear (Above 1000 V) Test Technique – Partial Discharge Measurements

PAR is approved/Working Group is active

HVCB

All documents current

HVF

C37.40 IEEE Standard Service Conditions and Definitions for High-Voltages Fuses, Distribution Enclosed Single-Pole Air Switches, Fuse Disconnecting Switches, and Accessories

Shown in the HVF report to be combined with C37.41, so it is assumed this document will be allowed to expire at the end of the year

HVS

All documents current

LVSD

All documents current

RODE

C37.66-2005

IEEE Standard Requirements for Capacitor Switches for AC Systems (1 kV to 38 kV)

Document was allowed to be withdrawn. PAR extension was approved so it may be reinstated early 2019.

SASC

All documents current

This is the list from IEEE Headquarters as of April 2019. If there are any inaccuracies, please bring them to my attention.

3. PROJECT STATUS

There are currently 15 active PARs. Of those active PARs, 1 expires this year. Items shown in red are on the IEEE list.

The following is a list of projects which will expire if no action is taken to extend their life. I ask that all the working group chairs review this list and take the appropriate action as follows:

If these projects will not be submitted to RevCom by the submittal deadline for the December 2019 meeting, you need to take one of the following steps:

1. Request an extension for the project (PAR). Please note that extension requests are usually granted from one to two years. Significant justification must be provided for an extension request which exceeds two years.
2. Request withdrawal of the project (PAR).

Log on to myProject (<https://development.standards.ieee.org/my-site>) to submit a request for either of these actions under the link for 'Submit a PAR'. Once submitted, the request to Extend an Approved PAR or the request to Withdraw an Approved PAR

will be placed on the agenda of the next scheduled NesCom meeting. NesCom will make its recommendation based upon the information provided.

The following PAR is due to expire and action is required:

PC37.62 IEEE Standard for Pad Mounted, Dry Vault, Submersible Fault, and Overhead Fault Interrupters for Alternating Current Systems up to 38 kV

If there is no action taken to extend these projects by the 17 September 2019 NesCom/RevCom submittal deadline, the PAR will expire on 31 December 2019.

The Standards Board work load is always substantial in December and they request PAR extension requests be sent in earlier where it is possible. The list below shows the meeting dates and associated deadlines. If you know you need an extension, please send it to the earliest possible meeting.

Deadlines for REVCOM/NESCOM Submittals

03 May 2019

26 July 2019

17 September 2019

If there are any errors or omissions, please bring them to my attention.

Reported 2 May 2019

Michael Wactor

Standards Coordinator
