

ADSCOM Report

Spring 2022

1. STANDARDS COORDINATORS REPORT

All documents are on a 10-year maintenance cycle. There is no reaffirmation process. Activity to revise documents must occur during that time period. The document cannot be reaffirmed as a stop-gap while the revision takes place.

The information in items 2 and 3 come from IEEE SA and the myProject website. If there are any inaccuracies, please bring them to my attention.

2. DOCUMENT STATUS

The following Switchgear documents are scheduled for Administrative Withdrawal on 31 December 2022.

Please note that having an active PAR does not extend the life of the standard.

These documents must be submitted to REVCOM no later than 13 October 2022.

ADSCOM

All documents current

HVCB

62271-37-082 High-voltage switchgear and controlgear – Part 37-082: Standard practice for measurement of sound pressure levels on alternating current circuit breakers

Expires 31 December 2022

C37.10 IEEE Guide for Investigation, Analysis, and Reporting of Power Circuit Breaker Failures

Expired 31 December 2021

HVF

All documents current

HVS

C37.30.1

IEEE Standard Requirements for AC High-Voltage Air Switches Rated Above 1000V

Expired 31 December 2021 Working group is active and the document is in process

C37.30.1a

IEEE Standard Requirements for AC High-Voltage Air Switches Rated Above 1000V – Amendment 1: Criterial for Acceptance

Expired 31 December 2021 Will be incorporated into C37.30.1

LVSD

C37.17

IEEE Standard for Trip Systems for Low-Voltage (1000 V and below) AC and General Purpose (1500 V and below) DC Power Circuit Breakers

Document and PAR expire 31 December 2022

RODE

All documents current

SASC

All documents current

3. PROJECT STATUS

The following PARs will expire 31 December 2022.

If these projects will not be completed and sent to RevCom by the submittal deadline for the December meeting, you need to take one of the following steps:

1. Request an extension for the project (PAR). Please note that extension requests are usually granted from one to two years. Significant justification must be provided for an extension request which exceeds two years.

2. Request withdrawal of the project (PAR).

PAR extensions or modifications can be made on myProject.
(<https://development.standards.ieee.org/myproject-web/app#>)

PC37.30.1 Standard Requirements for AC High-Voltage Air Switches Rated Above 1000 V

PAR expires 31 December 2022. Working Group is active.

PC37.17 Standard for Trip Systems for Low-Voltage (1000 V and below) and General Purpose (1500 V and below) DC Power Circuit Breakers

PAR expires 31 December 2022.

PC37.20.3 Standard for Metal-Enclosed Interrupter Switchgear Rated 1 kV ac up to and Including 48.3 kV ac

PAR expires 31 December 2022. Working Group active. Ballot in progress. Anticipate completion this year.

PC37.100.7 Guide for the Evaluation of Performance Characteristics of Non-Sulfur Hexafluoride Insulation and Arc Quenching Media for Switchgear Rated Above 1000 V

PAR expires 31 December 2022. Draft under development.

The Standards Board work load is always substantial in December and they request PAR extension requests be sent in as early as possible. The list below shows the meeting dates and associated deadlines. If you know you need an extension, please send it to the earliest possible meeting.

Deadline for REVCOM/NESCOM Submittals

6 May 2022

11 August 2022

14 September 2022

13 October 2022

If there are any errors or omissions, please bring them to my attention.

Reported 14 April 2022

Michael Wactor

Standards Coordinator
