ICRA 2020

Call for papers

ICRA is the IEEE Robotic and Automation Society's flagship conference and the first international forum for robotics researchers to present and discuss their work. The 2020 conference will be held from May 31 to June 4 at the Palais des Congrès de Paris, France.

Paris, the city of lights, rightfully earned its nickname through its influence over Europe and the rest of the world in the role she played during the Enlightenment and many revolutions. She has been at the heart of research, innovation & higher education since the Middle Ages and is home to one of the Western world's oldest universities, the Sorbonne, since the XIIIth century.

We cordially invite the international robotics community to this city with its long history, touristic fame and famous hospitality. Every year more than 32 million people come to visit Paris from around the world.

The Palais des Congrès de Paris, with its extensive technical capabilities and a high frequency of conferences, offers a unique collection of amphitheatres, meeting rooms, modular spaces and exhibition space to host the leading robotics conference. Combining bold architecture, international renown, a strategic, easy-to-access location and a wide range of nearby hotel accommodation, this venue has everything.

Our vision for this greatest robotics conference is to match technical excellence with French elegance in order to make the event a most memorable edition.
