

# Call for Demos

## Fifteenth IAPR International Conference on Machine Vision Applications

MVA2017: <http://www.mva-org.jp/mva2017/>

We cordially invite submission of demonstration proposals. This dedicated demonstration session will provide a good opportunity for you to show your innovative prototypes, get constructive feedback on your developed solutions or products, and communicate with participants directly. Technical topics of this session include all areas covered by the MVA conference.

### Application:

Prospective demonstration exhibitors should fill out and submit the application form and send it to technical event chairs by email:

Noriko Shimomura ([n-shimomura@mail.nissan.co.jp](mailto:n-shimomura@mail.nissan.co.jp))

Ryo Yonetani ([yonetani@iis.u-tokyo.ac.jp](mailto:yonetani@iis.u-tokyo.ac.jp))

**Submission Deadline:** 31 January 2017

**Date and time:** 14:00 – 16:30 on 8<sup>th</sup> and 9<sup>th</sup> May (tentative)

**Space:** 1.8x1.8m (tentative), one table, poster panel, electric outlet (100V)

**Registration:** FREE registration for three persons.

### Privilege:

The exhibitors will have an opportunity to participate in a lunchtime recruiting event for young researchers (students and post-docs) during the conference. Exhibitors can introduce their companies, recruit employees/interns, and call for participation in events such as a hackathon and other technology-related events. We encourage group discussions with a small number of young researchers. This is a great opportunity to discover talented and highly motivated young researchers by face-to-face communication in a relaxed atmosphere with free lunch. Individual discussion after the event is encouraged as well. One extra person for the recruitment effort will be allowed in the conference. Please contact us for details.

## Acceptance of Demonstration

The acceptance of the demonstration will be sent by mid-February 2017 at the latest. Earlier decision might be possible, if necessary. After the confirmation of acceptance, the exhibitors are required to submit the following:

- A demonstration summary of 100-200 words.
- The information on necessary resources/services for the demonstration (e.g. electrical supply capacity, how to deliver/carry exhibit materials, needed space).

For your references, check MVA2015 demonstration web page below:

<http://mva-org.jp/mva2015/program7.html>

(\*) The title could be modified, if needs be, when submitting the completed application.
